## FUEL SURCHARGE NOTICE

---

### APPLICATION OF FUEL SURCHARGE

All rates and charges published in any tariff CARRIER participates in, Contracts or Pricing Agreements, or Computer Rating Systems applying single line or jointly with a concurring carrier are hereby or will on their effective dates be increased as provided below for the period this Notice is in effect, unless otherwise specifically stated to the contrary.

The fuel surcharge will be added to all freight charges for line haul transportation and to all charges for other services that consume fuel (see NOTE A).

In applying the surcharge provided herein, first determine the applicable net freight charges, including all applicable increases or discounts, if any. The net freight charge so determined will be the charge to which the surcharge provided herein will apply.

The Fuel Surcharge will be adjusted (increased or decreased) to take effect on Wednesday of each week based on the U.S. Department of Energy's Weekly Retail On-Highway Diesel Prices of the prior Monday (or the next business day if Monday is a U.S. Government holiday). The web url is: <https://www.eia.gov/petroleum/gasdiesel/>

The published average diesel price will be rounded to the nearest whole cent when applying the formula shown above. Fractions of less than one half cent will be dropped. Fractions of one half cent or greater will be increased to the next whole cent.

The proceeds of the Fuel Surcharge Tariff increases are being passed along to the individuals or entities actually bearing the burden of the increased fuel cost.

When the price of diesel fuel falls below \$1.50 or rises above \$4.50, the table below will be updated.

NOTE A -- The term "NET FREIGHT CHARGES" referred to herein applies to all charges, including some accessorial charges for services that consume fuel.
